Career Objective

I came from web security to web programming as I am more interested into programming. I'm just brave enough to be bad at something new and interesting for learning and become good at something.

💼 Work Experience:

Web security researcher at East West Media Group Limited, 3/2015 - 5/2018

I was on the team who was responsible for web application security of Bangladeshi top online news portal (kalerkantho, bangladesh pratidin, daily sun). As I had interest and love to code. I also worked with the core development team to develop applications for implementing different features on the application. I developed Image Gallery, Quiz module of those applications.
